

COVID-19 Ag TEST

INTENDED USE

Turklab's COVID-19 Ag Test is a rapid immunochromatographic assay for the qualitative detection of SARS-CoV-2 nucleocapsid antigen in human nasal swabs in a professional environment.

- Reliable results in the acute phase (first 5-7 days) of COVID-19 infection.
- Varified detection of Omicron variant's nucleocapsid antigen.
- Showed no reactivity with other human coronavirus species or other respiratory viruses.

PERFORMANCE EVALUATION

- Sensitivity : 96,58%
- Specificity: 99,47%
