## **COVID-19 Ag TEST**

## **INTENDED USE**

COVID-19 Ag

CASSETTE

NASAL SWAB

Turklab's COVID-19 Ag Test is a rapid immunochromatographic assay for the qualitative detection of SARS-CoV-2 nucleocapsid antigen in human nasal swabs in a professional enviroment.

- Realiable results in the acute phase (first 5-7 days) of COVID-19 infection.
- Varified detection of Omicron variant's nucleocapsid antigen.

• Showed no reactivity with other human coronavirus species or other respiratory viruses.

## PERFORMANCE EVALUATION

- Sensitivity : 96,58%
- Specificity: 99,47%
